- 2 Velcro straps provide 12" adjustment in the width to maximum of 99".
- 6" flex top providing a 4" adjustment in the height

Up to 110" high available with optional oversize core charge

Available Options

Fan Kit

As an alternative to a rear evaporator, the Fan Kit allows temperature control in the second compartment. Specifications include: 10" diameter; 10 prong blade; 12 volt, 6000 hour brush motor life; displacement of 650 CFM; temperature range from -20° F to +80° F, and an On/Off switch.

Vent Kit

10" Diameter Vent with adjustable Velcro flap provides controlled air flow to rear compartment or return air flow when installed with a Fan Kit.

Custom Labeling up to 3.75" High

Identify your bulkhead with your company name and trailer number.
