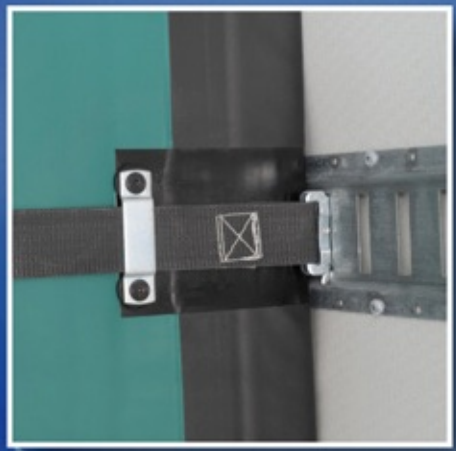
*Patent Pending*

# Available Options

## Fan Kit

As an alternative to a rear evaporator, the Fan Kit allows temperature control in the second compartment. Specifications include: 10" diameter; 10 prong blade; 12 volt, 6000 hour brush motor life; displacement of 650 CFM; temperature range from -40˚F to +80˚F, and an On/Off switch.



## E or F Straps

Installed with flush mounted hardware and comes with a UHMW abrasion guard to protect against premature wear from the track.

## Vent Kit

10" Diameter Vent with adjustable Velcro flap provides controlled air flow to rear compartment or return air flow when installed with a Fan Kit

## Custom Labeling up to 4" high

Identify your bulkhead with your company name and trailer number.

## Two-Way Hinge

Webbing reinforced on top and bottom, the Two-Way hinge allows entry from both compartments and prevents damage.

## Cold Draw Ventilation System

As an alternative to a rear evaporator, the Cold Draw is mounted in the upper corner of the trailer. Air is drawn into the center of the compartment by a 12 volt motor and distributed across the ceiling, maintaining a constant temperature.
