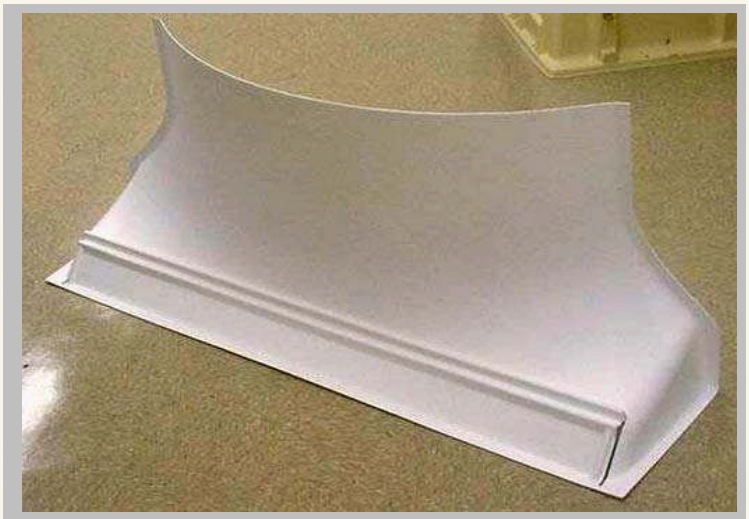
UNIMAX ADAPTER FEATURES:

- Universal Design
- Fits Thermo King and Carrier Units
- High Impact Molded Design
- Low Profile
- Unit Protection
- Increased Air Flow
- Reduces "fluttering" thereby decreasing the delamination process.
- Independent Header / Body Design



ITW INSULATED PRODUCTS

ITW Insulated Products has been in operation since the late 1970's. We are committed to developing and producing products for transporting refrigerated goods that are highly durable and easily configured to any application. Continuous research and development ensures our customers that as their needs change, so will our solutions.

The UniMax Adapter is a revolutionary design that will fit any refrigeration unit. The chute body fits to the UniMax Adapter with Velcro to provide a sleek finished appearance.

U.S. Patent Pending

The UniMax Adapter is an all-in-one patent pending design incorporating the chute header and adapter together. This unique design reduces the number of chute configurations needed within an application.
